A note on scratches

Although AR+ laminates offer superior abrasion and scuff resistance, the material is not 'scratch proof'. The use of items such as knives, keys or ceramic/terracotta objects may damage the surface. Scourers and abrasive cleaners should not be used.

Please refer to an AR+ sample before specifying as colour may vary slightly on this brochure due to the printing process

High Wear Resistant Gloss Laminate

High Wear Resistant Gloss Laminate offers exceptional abrasion resistance and lustre making it the preferred choice for kitchen bench tops. The unique AR+ technology delivers a harder wearing work surface with outstanding properties, more than twice as durable than traditional gloss laminates. AR+ is available in a range of fashionable colours direct from Europe.

For a colour sample or further information on the rest of Halifax Vogel Group's decorative laminate range please telephone Customer Service on 1300 854 166.

AR+ the only gloss laminate you'll want to use on your kitchen bench top.

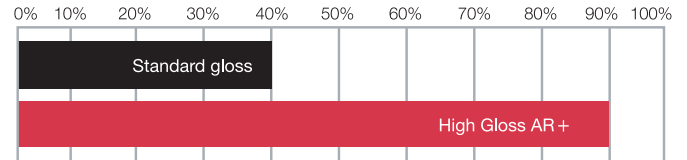

Technical Specifications

Description

AR+ is a glossy surface laminate for vertical and horizontal use. It is derived from new technology based on an extra layer of very hard particles pressed into the laminate. The surface has superior wear, abrasive and scuff resistance compared to existing gloss laminates available in the market. AR+ is flexible enough for a kitchen manufacturer to build bench tops with varying fashionable edge profiles.

Colour	Available in an extensive range of plain colours* and patterns
Surface Finish:	High Gloss
Sheet Size	3600mm x 1400mm
Grade	Post Forming Grade
Standards	Test results were conducted by Perstorp Research & Technology according to ASTM (D2197), for coating & surfaces, developed by N.C. State University. Creastyle AR+ Conforms to: <ul style="list-style-type: none"> • ISO 4586 • AS 2924 - 1987 • NEMA LD3
Impact Resistance	≥ 20 N

Proven Twice as strong as traditional gloss.

Laboratory strength tests show the competitive advantage of the High Gloss AR+ finish.

The graph above shows that High Gloss AR+ performs 110% better than the MAR strength of a standard quality gloss. Simply AR+ High Gloss is more than twice as durable as the current standard gloss.
