liberate inspiration

## seratone accessories

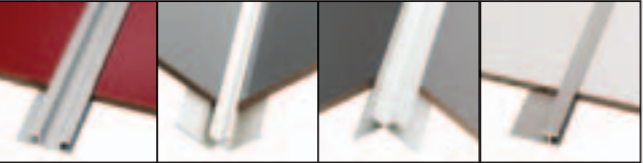

- seratone jointers
- seratone silicone
- seratone tape

Seratone surfaces free you to work creatively with texture, colour and light. Explore the design possibilities utilising Seratone's system of jointers and silicone to push the boundaries of your creativeness.

- Anodised and colour matched aluminium jointing options
- Colour matched silicone sealants for sealing all those wet area designs
- Seratone tape for use in installation of Seratone

The only limit to its use on walls, ceilings, cupboards, sliding doors and partitions is your imagination.

## seratone

**• PERFORMANCE IN THE WET**  
A "wet" area is any room supplied with water. For example: bathrooms, ensuites, toilets, kitchens, shower rooms, laundries, and changing rooms. Seratone Classics and Seratone Metallics are water resistant surfaces that are safe in all areas directly exposed to steam or moisture.

**• APPROVED FOR HYGIENE AREAS**  
Seratone Classics and Seratone Metallics surfaces are easy to clean, impervious to moisture and will not support mould growth. This makes them an ideal material for hospitals, restaurants, research facilities and all areas where hygiene is critical. It is approved by AgriQuality New Zealand Limited for use in dairy and food industries.

- *Frameless panels*
- *Curves and shapes for feature panels*
- *Fixed or removable panels (dry areas only)*
- *Mosaic or three dimensional effects (overlays & combinations with other finishes)*
- *Seratone in aluminium frames for sliding doors, office partitioning and furniture*

Design combinations of colour in any way you choose by mixing and matching from each of the colour ranges. The colour palettes have been specifically designed to complement each other.

## Seratone frees you

The Seratone range of vertical wall systems sets the tone for inspiring and even radical designs of modern interior living and working spaces – from boats and homes to corporate and medical settings. It liberates the old adage that functionality and pleasure only go together "so far." View this introduction to the colour range, applications and extreme versatility of the Seratone range – and be inspired to free your mind to float untethered towards new creative effects.

The lasting beauty of the Classics range is not just in the smooth surface, it's also in its lightweight, non-porous durable quality. Made from high density fibreboard coated with a multi-layered paint system, the panels easily resist marks, stains, steam and moisture. Use Seratone Classics to any effect. Serene, stunning or sensual... or all three.

The sheen of metal adds compelling depth to contemporary materials. The deep lustrous gloss of Seratone Metallics comes from a 200 micron automotive paint finish – the same as used on America's Cup boats. Needless to say it performs brilliantly in wet and dry conditions.

## seratone classics

## seratone metallics

## classics

*Fresh, light, reflective simplicity comes on a lasting mark resistant surface - satin or gloss.*

## metallics

*For depth of effect from tranquil to iconic - be inspired by colours that strikingly complement modern and traditional material.*

Seratone Classics are radiating light colours with no chill and all charm. Impervious to moisture and mould, they can be used in wet, dry and hygiene areas.

Get creativity really cooking with these brilliant metallic colours. Create endless different styles with Seratone's cleverly designed jointing systems and silicone sealants to really unleash the potential of your imagination.
